### **Project Contribution**

Index of Project folder: `.\AINT354 Dev`

All assets under the “`.\AINT354 Dev\Mixamo Assets`” folder are 3<sup>rd</sup> party. This also applied to the imported versions found in “`.\AINT354 Dev\Assets\Mixamo`”

Build: `.\AINT354 Dev\Build`

The only assets non-original are the Mixamo models and animations, all other assets were created from scratch. All code was written by myself. All files on Github were uploaded via my own account, showing ownership of files.

Final Presentation can be found in the Final Presentation folder in the root of the project.

Minor feedback from early December can be found at this location, although was only from a single person:

Extensive feedback was not obtained properly through the use of the demo sessions due to mental health issues impacting development throughout the semester. Some informal feedback post what is recorded above was obtained through having a friend test the demo, but no consent was obtained before the information was provided, so this other feedback is ineligible for submission.
